Directions (166-170): Read the following passage carefully and answer the questions given below them. Certain words/phrases have been printed in bold to help you locate them while answering some of the questions.

Paragraph 1: Given the uncertain times we live in, nothing can be taken for granted. Much of the world seems to be in a state of bewildering confusion. Across the spectrum, people appear euphoric, angry, fearful or confused. Many do not even want to think of what lies ahead. Therein, perhaps, lurks the biggest danger. Not wanting to understand what is taking place has its own perils. Disruption is the dominant sentiment today. It is leading to major political upheavals. It has resulted in escalating levels of violence. Technology is the biggest disruptor of all. Many large firms are being challenged by start-ups. Artificial Intelligence is threatening everything that we are aware of. This breeds uncertainty, apart from confusion.

Paragraph 2: How else can anyone explain the extraordinary spectacle of a U.S. President effecting a meeting with a North Korean leader. Till very recently, North Korea was seen by the U.S., and much of the West, as the principal part of the "axis of evil". Not only has this been exploded with the leaders of the U.S. and North Korea meeting in Singapore in June, but the U.S. has announced that North Korea no longer poses a nuclear threat, nor is it the "biggest and the most dangerous problem" for the U.S. No diplomatic rigmarole, no joint communiqué on the details and guarantees, just a simple endorsement that North Korea would **eschew** the use of nuclear weapons and **dismantle** its nuclear arsenal is considered enough.

Paragraph 3: The rest of the world, meantime, is in various stages of disarray. Russia's Vladimir Putin is pitted against almost the entire Western world, and is being blamed for an array of human rights violations. Several regions of Asia are akin to powder kegs waiting to blow up. Afghanistan is rocked almost daily by terror attacks by the Taliban, the Tehreek-e-Taliban Pakistan, or the Islamic State. West Asia is embroiled in several wars. Syria is the worst-affected and has almost ceased to be a state. Tensions between Iran and Saudi Arabia have intensified. Tensions between Israel and the Muslim world have peaked. The war launched by the Saudi Arabia-led alliance of Arab States against Yemen is turning into a war without end. In South Asia, even tiny countries like the Maldives are challenging bigger neighbours like India.

Paragraph 4: Europe may not be convulsed with the same degree of violence, but political uncertainty is the prevailing order. Germany, which appeared the most stable of European countries till recently, is in deep crisis

politically and Chancellor Angela Merkel's government hangs by the proverbial thread. In France, despite President Emmanuel Macron's reassuring presence, strong undercurrents of political disruption are evident. A fluid political situation prevails across much of southern Europe.

Q166. "Given the uncertain times we live in, nothing can be taken for granted". As per the passage, which of the following are the factors that propagate this uncertainty?

- (a) Evolution of start ups in the advancing world can bother various large organizations.
- (b) Political disorders and growing violence as a product of disruption.

- (b) Countries that were well-developed and provide good job opportunities.
- (c) Countries that have no democracy and are still under monarchy.
- (d) Countries becoming a victim of terrorist activities and mass destruction.
- (e) None of the Above

Directions (171-175): Read the following passage carefully and answer the questions given below them. Certain words/phrases have been printed in bold to help you locate them while answering some of the questions.

Paragraph 1: For consumer inflation, yesterday's tailwinds have become today's headwinds. If imported inflation helped lower the consumer price index (CPI)-based inflation to an average 3.6% last fiscal from 9.9% in 2013—of course helped also by a prudent government stance on minimum support prices (MSPs) and the Reserve Bank of India's (RBI) inflation-targeting framework—it is stoking it now. CPI inflation flared up to 4.9% in May, fuelled by rising prices of imported crude. In this context, segregating inflation components into pro-cyclical and acyclical parts, and analysing their movement, is revelatory indeed. Pro-cyclical components are those that typically move with economic cycles. For instance, when growth picks up, incomes rise and drive up consumer demand. As that happens, sectors with relatively high income elasticity see greater demand. As supply takes time to catch up, prices rise. Acyclicals are mostly exogenous and do not move with the economic cycle, such as prices of food, fuel and healthcare. However, if inflationary pressures from acyclicals become persistent in an environment of strong demand, they can become generalized over time.

Paragraph 2: Last fiscal, acyclical inflation stood at 2.9%, diving from 4.6% in fiscal 2016. Pro-cyclical inflation, in contrast, was relatively stubborn and fell from 5.3% to 4.6%. What restricted the fall was upward revisions in the house rent allowance (HRA) of government employees, which kept housing inflation elevated. This fiscal, we expect acyclical factors—in particular, food and fuel—to drive up inflation, while pro-cyclicals could continue to remain stubborn if growth momentum is strong. Among acyclicals, risk from higher crude prices is currently playing out, while that from higher food prices is lurking and can materialize should the government raise MSPs and guarantee them to farmers. In recent years, while pro-cyclical inflation has softened, it has been fairly rigid. That was in sync with India's gross domestic product (GDP) growth, which fell from 7.1% to 6.7%. The pricing power of manufacturers weakened as domestic demand conditions stayed subdued and swathes of capacities went unutilized. The inflation rates of all pro-cyclical components, except housing, saw a fall. The impact of the revision in HRA, which had pushed up inflation last fiscal, is expected to taper off gradually, but other components could swing north. Consequently, the gradual pick-up in demand and utilization would not be enough to sate these capacities. Pricing power, therefore, could stay restrained.

Q171. Which of the following statements can be inferred from the passage above?

- (a) Core inflation, which strips out the relatively volatile food and fuel prices, has also trended lower and eased below 4% for the first time in at least five years.
- (b) Higher cost of borrowing will dampen investment, which can decelerate economic recovery in an election year.
- (c) The voices exhorting the central bank to reduce interest rates are only going to grow ahead of its next bimonthly policy review at the beginning of August.
- (d) Pro-cyclical inflation was obdurate and hence fell from 5.3% to 4.6%.
- (e) None of the Above

Q172. As per the passage, rise in growth is followed by rise in income which is followed by increase in demand. What is the effect on prices?

- (a) Supply is accelerated and as a result prices decrease.
- (b) Supply takes time and as a result prices decrease.
- (c) Supply is accelerated and as a result prices rise.
- (d) Supply takes time and as a result prices rise.

S41. Ans.(a)

Sol. The error lies in part (E) of the sentence. To make the sentence grammatically correct, replace "does" with "did" in the erroneous part. It is to be noted that "used to" in part (B) is used to indicate a past activity of a person. Therefore, to maintain the sequence of tense in the sentence, "does" should be replaced with "did" which is the past form of 'does'. Since all the other parts are correct, option (a) becomes the most suitable answer choice.

S42. Ans.(b)

Sol. The error lies in part (A) of the sentence. There is no need for "fastly" because "fast" is both an adjective and an adverb. The existence of "fast" as an adverb does not preclude the future development of a word "fastly", but it does hinder it. Therefore, to make the sentence grammatically correct replace "fastly" with "fast". Hence, option (b) is the most suitable answer choice.

S43. Ans.(d)

S46. Ans.(c)

Sol. The final sequence is CADBFE.
(C) provides the introduction for the paragraph 'seat-sharing talks between the BJP and the JD (U)'. Hence, it should be the first sentence of the coherent paragraph.
(A) introduces a JD (U) leader Mr. R.C.P. Singh which the statements (D), (E) and (F), which mention or refer to Mr. Singh, don't. So, (A) must precede the statements (D), (E) and (F).
Now, among (A) and (B), which one should be the second sentence of the paragraph?
The statement (A) quotes the leader who reiterates the theme of the paragraph "The seat-sharing arrangement with the BJP is in the final and last stage..." So, (A) qualifies (C) better than (B). So, (A) should be the second sentence.
Which one should be the third sentence? The statement (D) qualifies Mr. Singh, and so, it should immediately follow (A) because (A) introduces R.C.P. Singh. So, (D) should be the THIRD sentence.
Hence, we get the sub-sequence CAD.

The statement F starts with 'Mr. Singh', while the statement (E) starts with a pronoun 'He'. A pronoun usually appears only after its antecedent is introduced. The statement (F) introduces Mr. Singh while the statement (E) uses the pronoun 'he'.

Now, thinks, what would be the need to re-introduce Mr. Singh when he is already introduced and appears till the statement D?

Such need would only arise only when a sentence introduces something completely different aspect to the paragraph without mentioning and/or referring to Mr. Singh. That sentence is (B).

So, (B) should be the Fourth sentence. After the appearance of (B) as the fourth sentence, there would be a need to re-introduce Mr. Singh to convey the additional information conveyed by Mr. Singh.

Now, among (F) and (E), we have already decided why (F) should be the FIFTH sentence (because, it re-introduces Mr. Singh).

Now, (E) must be the LAST sentence.

Hence, the final sequence is CADBFE. Therefore, option (c) is the most suitable answer choice.

S47. Ans.(a)

Sol. The final sequence is CADBFE.

(C) provides the introduction for the paragraph 'seat-sharing talks between the BJP and the JD (U)'. Hence, it should be the first sentence of the coherent paragraph.

(A) introduces a JD (U) leader Mr. R.C.P. Singh which the statements (D), (E) and (F), which mention or refer to Mr. Singh, don't. So, (A) must precede the statements (D), (E) and (F).

Now, among (A) and (B), which one should be the second sentence of the paragraph?

Which one should be the third sentence? The statement (D) qualifies Mr. Singh, and so, it should immediately follow (A) because (A) introduces R.C.P. Singh. So, (D) should be the THIRD sentence.

Hence, we get the sub-sequence CAD.

The statement F starts with 'Mr. Singh', while the statement (E) starts with a pronoun 'He'. A pronoun usually appears only after its antecedent is introduced. The statement (F) introduces Mr. Singh while the statement (E) uses the pronoun 'he'.

So, (B) should be the Fourth sentence. After the appearance of (B) as the fourth sentence, there would be a need to re-introduce Mr. Singh to convey the additional information conveyed by Mr. Singh.

Now, among (F) and (E), we have already decided why (F) should be the FIFTH sentence (because, it re-introduces Mr. Singh).

Now, (E) must be the LAST sentence.

Hence, the final sequence is CADBFE. Therefore, option (a) is the most suitable answer choice.

S48. Ans.(d)

Sol. The final sequence is CADBFE.

(C) provides the introduction for the paragraph 'seat-sharing talks between the BJP and the JD (U)'. Hence, it should be the first sentence of the coherent paragraph.

(A) introduces a JD (U) leader Mr. R.C.P. Singh which the statements (D), (E) and (F), which mention or refer to Mr. Singh, don't. So, (A) must precede the statements (D), (E) and (F).

Now, among (A) and (B), which one should be the second sentence of the paragraph?

Now, (E) must be the LAST sentence.

Hence, the final sequence is CADBFE. Therefore, option (d) is the most suitable answer choice.

S49. Ans.(b)

Sol. The final sequence is CADBFE.

(C) provides the introduction for the paragraph 'seat-sharing talks between the BJP and the JD (U)'. Hence, it should be the first sentence of the coherent paragraph.

Hence, we get the sub-sequence CAD.

The statement F starts with 'Mr. Singh', while the statement (E) starts with a pronoun 'He'. A pronoun usually appears only after its antecedent is introduced. The statement (F) introduces Mr. Singh while the statement (E) uses the pronoun 'he'.

Now, thinks, what would be the need to re-introduce Mr. Singh when he is already introduced and appears till the statement D?

Such need would only arise only when a sentence introduces something completely different aspect to the paragraph without mentioning and/or referring to Mr. Singh. That sentence is (B).

So, (B) should be the Fourth sentence. After the appearance of (B) as the fourth sentence, there would be a need to re-introduce Mr. Singh to convey the additional information conveyed by Mr. Singh.

Now, among (F) and (E), we have already decided why (F) should be the FIFTH sentence (because, it re-introduces Mr. Singh).

Now, (E) must be the LAST sentence.

Hence, the final sequence is CADBFE. Therefore, option (d) is the most suitable answer choice.

It has resulted in escalating levels of violence. Technology is the biggest disruptor of all. Many large firms are being challenged by start-ups. Artificial Intelligence is threatening everything that we are aware of. Disruption here has been considered as the major reason behind political disorders and violence.
