**Direction (Q. No. 135 to 139)** : Read the passage below and answer the questions :

Hari had stayed into Nehru household as a dishevelled urchin of five or six years old. His father, who was a cook at the house of an English official, was an irresponsible, hard drinking rascal who beat his wife mercilessly. The poor woman finally sought refuge in the premises of Swaraj Bhavan and so Hari came to be noticed by my grandfather. Nanuji; always ready to help those in distress, found him a bright youngster and decided to employ the little untouchable boy. So Hari grew up in the family's service and was sent to School by Nanuji. Un accustomed to a life of rules and regulations, he cheerfully ignored its demands. He lied outrageously, stole whenever he had the chance and coolly be trayed the trust that (C.N. Sahgal) had been placed in him.

135.

The poor woman finally sought refuge in the premises of Swaraj Bhavan. The poor woman here refers to

Direction (Q. No. 159 to 163) : Read the passage below and answer the questions :

One day while at work in the Coal Mine, I happened to overhear two miners talking about a great school for coloured people somewhere in Virginia. I resolved at once to go to that school, although I had no idea where it was or how many miles away or how I was going to reach it. In the fall of 1872, I determined to make an effort to get there. My mother was troubled with a grave fear that I was starting out on a 'wild-goose chase'. At any rate, I got only a half-hearted consent from her that I might start. My brother helped me all that he could but, of course that was not a great deal.

**Direction (Q. No. 184 to 188)** : Read the passage below and answer the questions :

Linguistics is the scientific study of language. It endeavours to answer the question - what is language and how is it represented in the mind. Linguists focus on describing and explaining language and are not concerned with the prescriptive rules of the language. Linguists are not required to know many languages and linguists are not interpreters. The underlying goal of the linguist is to try to discover the universals concerning language. That is, what are the common elements of all languages. The linguist then tries to place these elements in a theoretical framework that will describe all languages and also predict what cannot occur in a language. Linguistics is a social science that common ground with other social sciences such as psychology, anthropology, sociology and archaeology. It also may influence other disciplines such as english, communication studies and computer science. Linguistics for the most part though can be considered a cognitive science.
